

# A “SENSE-ABLE” Team Approach to helping children with sensory processing challenges across different environments

Thursday 22 September 2016

5:30pm—7.30pm

Telethon Speech & Hearing

Tomasi Room, Bendat Parent and Community Centre

36 Dodd Street, Wembley, Perth

A\$92.61/ticket (GST inclusive)

## Presenter

Gayle Hillen (Presenter, Occupational Therapist, Telethon Speech & Hearing) has practised as an Occupational Therapist for over 30 years. Gayle has grounded clinical expertise, plus a passionate drive to enable children of all ages, especially by empowering their families, caregivers, educators and therapists to process and regulate sensory information effectively to engage, develop and learn.

This workshop style seminar will offer participants the opportunity to understand what sensory processing looks like in the home, day-care, school and community environments and learn to identify the signs and effects of faulty sensory processing. As a TEAM, participants will explore practical, SENSE-ABLE sensory, emotional and behavioural strategies to lessen the impact of sensory processing challenges that children may be experiencing across the different environments. This workshop is suitable for educators, other professionals and parents/caregivers.

To register, go to the following link. Places are limited.
