RESOURCES TECHNOLOGY
SHOWCASE 2019 PERTH
27+28 NOVEMBER

A NEW EVENT TO REIMAGINE RESOURCES

On November 27 and 28, Seven West Media will host the Resources Technology Showcase 2019 at the Perth Convention and Exhibition Centre.

Supported by Austrade, the Government of Western Australian and some of the world's most influential resource companies, RTS2019 will be a public-facing celebration of the technological breakthroughs which have made Australia's resources industry the most innovative and competitive in the world.

RTS2019 will give technology and innovation officers from the international resources industry a forum to explain and predict the breakthroughs transforming their businesses.

Seven West Media's unrivalled marketing power will immerse the Australian public and key decision-makers in the unique technology which is transforming the mining and oil and gas industries, and creating the jobs of tomorrow.

INNOVATION FRONTIER: THE CONFERENCE

The two-day program will feature keynote addresses and panel discussions with CEOs, CIOs, CTOs and CDOs from the world's biggest mining and oil and gas companies.

The audience of paid delegates will include technology suppliers, leading Australian politicians and policymakers, industry regulators, prominent academics, school and university curriculum chiefs and international media.

TECHNOLOGY SHOWCASE

Free to the public, and WA schools and universities, the showcase component of RTS2019 is designed to reshape Australia's view of the resources industry.

Interactive displays of the show-stopping technology driving the sector will confound the public perception that mining and oil and gas is about red dust, hi-vis and FIFO.

The showcase of robotics programs, augmented-reality projects and autonomous-haulage initiatives will transform PCEC into a technology hub which will be visited by thousands of school students, university undergraduates and members of the public.

The exhibition will promote resources companies as employers of choice.

The wider Perth CBD will be activated with mining equipment, demonstrations and displays which will put the focus on the city as a centre of excellence in resources technology.

EXPRESSION OF INTEREST

We invite and encourage all schools to participate and can assist in facilitating an excursion.
