

**Does your school or child care centre meet the standards for first aid?**

**St John Safe**

[stjohnwa.com.au](http://stjohnwa.com.au)

## The St John Safe program recognises schools and child care centres that are prepared for any first aid situation.

Being recognised as St John Safe provides a way of identifying and communicating to parents, the wider school community and the public that you have the right first aid training, equipment and systems in place to deal with any first aid situation. It is recognition that your school or centre has met their first aid obligations, and it provides peace of mind for people knowing that their children are in safe hands.

### How does it work?

Our first aid specialist will come to your school or child care centre and conduct a St John Safe assessment. They will then work with you to compile detailed recommendations to assist you in becoming endorsed as St John Safe. These recommendations may include:

#### First Aid Training

The assessment will identify the number of staff to be trained in first aid.

#### Defibrillators

Making defibrillators more accessible can be the difference between life and death. Our specialist will work with you on identifying the best way to achieve this, including training, placement and maintenance.

#### First Aid Kits

The appropriate number and type of first aid kits for your location will be recommended.

#### First Aid for Families:

Increase the resilience of your wider community with child-specific first aid sessions for your family groups.

### How can your school or centre be St John Safe?

Once your St John Safe assessment has been completed and appropriate training, equipment and systems have implemented, you will then be recognised as being St John Safe

You will be presented a certificate to formally recognise your St John Safe endorsement.
